

PRESS RELEASE

Berlin, 31st May 2007

Solarvalue Business Report 2006 now available

The 2006 business report for Solarvalue AG is now available to download from www.solarvalue.de. A printed copy can be requested directly from the company. "2006 marked our development into a fully integrated photovoltaics company", said Claudia Boehringer, CEO of Solarvalue AG.

The successful contract negotiations to use the factory in Ruse, Slovenia, in 2006, paved the way for the future production of solar grade silicon. After an intensive reorganisation period, Solarvalue plans to begin manufacturing low-cost solar grade silicon from metallurgical silicon as early as this year.

The general meeting took place in Berlin on 27th April 2007. All voting results of the meeting and the speech made by Claudia Boehringer (in both German and English) are available from www.solarvalue.de.

Solarvalue AG was established in June 2005 by Dr. Karoly Horvath. The initial purpose of the company is the manufacture of solar grade silicon. The long-term goal is the development of the entire value chain of an integrated PV enterprise.
